

THE UNIQUE VALUE OF A NECO PACKAGED PUMP SYSTEM

As many of our customers know NECO Equipment Co. has been providing pumping equipment and packages for 20 years. Today our primary business is manufacturing *Economically Customized Pumping Packages*.

Our Packages are provided directly to HVAC, mechanical and plumbing contractors within a 150 mile of our headquarters in Souderton, PA.

Beyond 150 miles from Souderton our packages are sold through and supported by pump/equipment distributors. These locations currently include Pittsburgh, Baltimore/Washington, and New York City with plans for Hartford, Boston, Syracuse, Rochester, Buffalo and Puerto Rico in the works.

NECO economically customizes pumping packages to meet the detailed requirements of a specific installation. We insure our packages satisfy unique requirements including:

- Selecting the optimal pumps (end suction, base mounted, or vertical multi-stage) to meet the conditions.
- Orienting components on the package to fit the intended location and space available.
- Locating the single suction and discharge connection for the most efficient piping connections
- Optimally locating package controls for ease of access
- Configuring packages to fit through limited access corridors or doorways
- Providing package controls with interfaces to Building Management Systems and using energy efficient motors and variable frequency drives.

NECO's economically customized packages **reduce** overall installation costs, **improve** reliability, **reduce** maintenance costs, and **reduce** overall footprint saving space.

Neco's other packaged & customized systems include:

- Water Pressure Booster
- Sewage Lift Stations
- Boiler Feed Systems
- Elevator Sump Pumps with oil sensors
- Packaged Chilled Water and Hot Water Circulating Systems
- Condensate Return Units
- Geothermal Circulating Systems
- Rain Water Harvesting Systems
- Heat Transfer Systems
- Fuel Oil Pump Sets
